Cloud Computing: Lab Exercise 2

Follow the tutorial at:
`https://developers.redhat.com/blog/2017/03/07/how-to-set-up-a-lamp-stack-on-red-hat-enterprise-linux-7/`
but ignore the part about setting up the firewall ports for `http` and `https` because that is taken care of at the EC2
management console.

Install a web server that will provide an accessible version of one or more of the following writer. Shakespeare's
plays (choose Hamlet, Macbeth, or King Lear), Dickens' A Christmas Carol, or Wilde's The Picture of Dorian Grey.
